

The More You Know...

9 Key Benefits of DPF & Engine Cleaning with BAC101 and Hydrogen.

Comprehensive Cleaning:

BAC 101 effectively removes all four elements that block DPF filters: Carbon, Soot, Oil, and Ash.

Ash Removal:

BAC101 is unique in its ability to remove ash from DPF filters without causing damage.

Speed & Efficiency:

The entire DPF cleaning process with BAC101 usually takes less than two hours."

Ease of Use:

Hydrogen engine cleaners are incredibly user-friendly, simplifying the cleaning process for automotive professionals.

Plug & Play Operation:

Simple setup and operation require minimal technical expertise, saving time and reducing errors.

Hands-Free Operation:

The pulse drive module allows automated cleaning, minimizing human intervention and ensuring consistent results.

Safe & Effective :

Hydrogen gas effectively removes carbon deposits without damaging engine components.

Increased Engine Performance:

Removes carbon buildup, leading to smoother idling, better acceleration, and reduced engine noise.

Enhanced Fuel Efficiency:

By restoring engine performance, DPF and Hydrogen cleaning improve fuel economy by 10-15%.

DPF Filter Cleaning System

(No open box)

Cutting-Edge Hydrogen Generators & The World's First DPF Cleaning System That Works on Both Gasoline and Diesel Vehicles

Affordable DPF Filter Cleaning System (No-Open Box) - Authorized Dealer!

- Ash removal ● Speed & Efficiency ● Safe & Effective ● Recover HP
- Fuel economy ● Smoother idling ● Less frequent repairs
- Recover HP ● At all of our locations

Special DPF-Clean pricing for fleets and repair shops
and for system to purchase also. Call Today!

Making Engines Cleaner With Science

Eliminating Engine Carbon Through Innovative Technology.

The company founders and the inventors of our technology worked tirelessly looking for a way to revolutionize the hydrogen-based Engine Carbon Cleaning and DPF Cleaning markets. We have years of service experience using Hydrogen gas and our patented chemical process to clean DPF filters on thousands of diesel vehicles. Our goal is to provide world-class customer service and supply products that ease the pain of Fleet Owners, Shop Owners, and Technicians.

Improving Performance.

We offer cutting-edge Hydrogen Generators producing 3400 - 4200 litres of Hydrogen gas per hour. Using the industry's only Quad Pulse Technology, we deliver more Hydrogen gas through the entire combustion and exhaust systems, allowing for a deeper clean. All of our machines operate at 110v power with no special electrical requirements. We have a proprietary line of the highest purity electrolyte to fuel the machines for optimal performance and cleaning of the electrolyzer cells.

DPF Filter Cleaning For Better Drives

BAC - Based DPF Cleaning.

Our BAC101 DPF 2-part cleaning products deliver optimal results, reducing Ash, Soot, Oil, and Carbon buildup. Over four years and 100 different formulas later, our dedicated team of engineers and designers developed Formula #10. The result is BAC101, the world's first DPF cleaning system that works on both gasoline and diesel vehicles

to reduce emissions systems related costs and its best when used as a maintenance tool, cleaning your fleet, every six months to once per year based on how you operate your fleet. You never have to remove your filter to clean it again, which means no more idle trucks, no more trucks in

d-rate, fuel efficiency will rise and your operating costs will drop. Cleaning with BAC101 could not be simpler. With our innovative 2-part cleaning system you can finally remove all 4 elements of a blocked DPF filter, without draining your energy or wallet!

The Ultimate Engine & DPF Cleaning Service

S8M-3400 - 50 Use Kit - **Call us for Pricing information.** Kit comes with enough supplies to clean 50 Diesel Trucks. S8M-3400 is designed and built primarily for the auto shop and mobile market, with a flow rate of 3400 liters per hour. The S8 utilizes 64 plates, layer coated tank, a custom-built high-flow quad pulse module, distilled water, and our specialized electrolyte. Use of non-distilled water/ different electrolyte will cause damage to the machine and reduce its output.

Hydrogen Cleaning Features and Benefits:

- Recover lost fuel economy
- Restore lost horsepower
- Smoother idling and increased turbo boost
- Removes carbon from direct injectors, helping restore injector spray patterns
- Reduces EGR cooler plugging
- Minimizes DPF clogging
- Cleans combustion components (valves, pistons, turbo vanes, etc.)
- No time-consuming or costly engine disassembly required
- Quick 120-minute service
- No oil change required
- Keeps vehicles running cleaner, reducing emissions and environmental impact

Included in the Kit:

- S8M 3400 Hydrogen Carbon Cleaner
- Twin hose kit
- 70g electrolyte starter bags
- Funnel & instruction manual
- Power cable
- 2x25 doses of BAC101 DPF "B" & "C" solution
- BAC101 pump with nylon pipe & flexible metal wand
- Power: 110V, 1690W peak, 10A (2000W inverter required for 12V)

We aim to provide stellar, enhanced cleaning services that empower drivers, reduce costs, and improve performance.
